COMPREHENSIVE GENERAL AND LAPAROSCOPIC SURGERY SERVICES

When it comes to advanced surgical care, BL Tiwari Memorial Hospital in Mathura stands out as a leading institution. Specializing in general and laparoscopic surgery, the hospital offers cutting-edge medical procedures with a patient-centric approach, ensuring better outcomes and faster recovery.

What is Laparoscopic Surgery?

Laparoscopic surgery, also known as minimally invasive surgery, uses small incisions and a camera-equipped instrument called a laparoscope to perform operations. This technique reduces pain, minimizes scarring, and shortens hospital stays compared to traditional open surgery. It's widely used for procedures involving the gallbladder, appendix, hernias, and more.
